

Curriculum medical doctor programme (MD)

A outcome based curriculum with early patient contact, subject integration and spiral learning

(in year 3-5 the students are divided in two groups with opposite order of progression)

Three longitudinal themes from 2019:

- Health promotion and disease prevention
- Scientific competence
- Professionalism and communication

■ Patient contact: LPK (doctor-patient course) in part I, clinical rotation in part II, practice in local hospitals in year five, and practice in primary care in year six

PBL: Problem Based Learning
 MCQ: Multiple Choice Question
 OSCE: Objective Structured Clinical Examination

MSc: 10% of the students take a dual degree - MD+MSc
 TverrSam: cross professional collaborative training
 EIT: Experts in Team - cross professional collaborative training
