Supporting questions – supervisors assessment of the candidate

Supervisor assesses for each point to what extent the candidate has achieved these goals:

The work with the thesis

Assess the candidate's work in regard to:

- Showing creativity and/or contribution to innovation
- It gives the impression of being particularly extensive work.

Theoretical insight and own contribution:

Assess the candidate's theoretical insight and own contribution, amongst other if:

- The candidate has generated important elements/problems addressed in the thesis.
- The candidate uses current and updated literature and background knowledge for the work.

Skill level:

- Assess if the candidate masters relevant methods and uses them in his/her own work in an appropriate and integrated way.
- Assess the candidate's ability to structure the thesis in an adequate way.
- Assess the candidate's linguistic skills.

Working methods:

Assess the candidate's ability to systematical and methodical work.

Effort:

Assess if the candidate shows ability to high effort and solid professional commitment.

Independence/originality:

Assess the candidate's ability to work and use relevant methods in a independent way, and to complete an independent research- or development project under guidance. Assess this especially concerning:

- Showing of personal initiative
- What kind of help and guidance has the candidate received in the different stages in the work.
- The candidate's ability to make use of the research groups' professional competence in their own work.

Progression:

Give a short summary of the candidate's progression through the writing of the thesis.
